

Table luminaire with direct light for indoor use.

A light antenna. Antennas are mysterious, absolute and intrinsically beautiful, because their essentialness expresses nothing more than their function.

The base is painted matt black anodised aluminium. The stem is in matt black fibreglass and can be tilted. The spotlight is in matt black anodised aluminium and is adjustable in one direction.

The light source is LED with integrated module. The matt black USB-A/USB-C electric cable is 2,5 m long and is included. The power socket is fitted into the base. The luminaire is switched on and off and controlled by a button fitted into the base. The power supply is plug-in and not included, but is available as an accessory.
