

/ Absolute freedom, absolute spatiality, absolute creativity.

The Euclidean representations of the Fundamental States of light:
direct, indirect and diffuse.

The possibility to take light anywhere, freely,
without any electrical constraints.

Each product lives its own life, but can be integrated and blended with
others. **Endless** can be used to power **Infinito, Flash, Ohm**.

Technology helps to break down the boundaries.

Intangible, almost invisible materials, hidden, camouflages conductors,
thin cobwebs of filaments that carry and draw the light.

Light running on digital tracks, ultra-light and almost invisible wires,
modular tapes that can be laid limitlessly on
stairs, windows, glass panels.

Circuit that close, accent lighting, ultra-light diodes.

Different, modular and compatible products together with Endless.

All this is part of our Sistemi.

Light runs on a wire.
An almost imperceptible wire, suspended in space.
Like a tightrope walker on an ultra-thin wire,
the light reaches everywhere, thrilling and impalpable.
Ohm is an electro-mechanical project that exploits the characteristics
of light-emitting diodes to the full. It pays homage to the great German
scientist Georg Simon Ohm and to the fundamental principles of
electricity. Ohm's secret is a special single-pole cable running between
two walls. The source is practically hidden, discreet and intangible.
Ohm draws the space, creating almost invisible cobwebs that support
the diodes, sources of projected light, tiny light sources suspended in a
vibrating space.
