

FEATURED LIGHTING MANUFACTURER

DAVIDE GROPPI

It all started in a small laboratory in the historical centre of the Italian town of Piacenza during the late 1980s. Davide Groppi was inventing and producing his first lamps and decided simply to use his own name for the name of the company.

The fundamental components of a Davide Groppi design are simplicity, lightness, emotion and creative invention. The company's products are characterised by their pursuit of technology and innovation, their rigorous attention to design and function and a profoundly humanistic approach which places the social aspects of the business at the very core of the design process.

The Davide Groppi factory is in Piacenza, and includes the Spazio Esperienze (also one in Milan) - a space open to architects, designers and members of the public who wish to learn more about the company, its ethos and its products.

Davide Groppi has also been recognised for excellence by the press and received prestigious awards for his lighting creations, including the Edida Award in 2011 for the Sampei lamp, as well as two ADI Compasso d'Oro Awards for the Nulla lamp and for the Sampei lamp and an ADI Compasso D'Oro Mention of Honour Award for TETATET.

INFINITO

Infito is a spatial concept; it is continuous light. A thin strip made of stainless steel a mere 18 mm in width "cuts" the space to produce indirect light.

It is possible to adapt Infito to various situations, stretching it from wall to wall or ceiling to floor, according to one's taste or needs. It comes in strips up to 12 m in length.

Infito: essence and absence.

66 / 132 W LED - 7200 / 14400 lm - DALI - PUSH - 1 / 10 V DIMMABLE

FLASH

It is Infito turned around, creating direct light that flows downward from the light source. The stainless steel strip, 9 mm in width, can be stretched up to 12 m in length.

Flash* is the ideal solution for direct illumination of spaces with very high ceilings.

Flash* pays homage to the famous comic book superhero of the same name who can run seven times the speed of light.
